## Build your garage door

Visualize your home with a new garage door. Visit [garaga.com/designcentre](https://garaga.com/designcentre) or scan the QR code.

# Why have more than **3.6 million Garaga** **doors** been installed since 1983?

## Superior performance

Get a product that exceeds your expectations. Our Standard+ and Acadia 138 garage door models, inspired by Canada's severe weather, are **energy efficient** as they are first and foremost weathertight. They are **strong** and constructed with **long-lasting components**, rigorously selected to give a flawless finish, both up close and at a distance.

## One of the largest selections in the industry

With **thousands of possible combinations**, you are sure to find the garage door you are looking for. Select style, color and much more by visiting **garaga.com/designcentre**. There you can create and view online the perfect door to enhance your house and be assured you're making the best decision.

## A detailed quote for an informed choice

All the options you want can be **quickly** calculated then presented to you in a **clear, illustrated quotation**. Once your garage door has been chosen, your quotation is automatically transmitted to our factory to be **precisely custom-crafted**.

**IN-GARAGE DELIVERY READY**  
with a reliable Garaga garage door!

Find out the must-haves and the steps to get started. Keep your online deliveries safe, visit [garaga.com/ingaragedelivery](https://garaga.com/ingaragedelivery) or scan the QR code.

## SIZES

Widths from 8' to 18', in 1" increments. Heights from 6'6" to 8', in 3" increments. See your garage door dealer for more details on oversized doors available.

## WARRANTY

Door sections: limited lifetime

Dura+ hardware: 2 years/Value kit: 1 year

Weatherstripping: 1 year

Windows: 10 years against seal defects

1 year for thermal break

R-16 and R-12 constructions

2

1

3

## GARAGA CONSTRUCTION MAKES ALL THE DIFFERENCE

3 layers, polyurethane insulation and

- 1 Polyurethane insulation** acts as a thermal break to prevent transfer of cold or heat
- 2 InterLok™ joints** block air infiltration for superior thermal insulation
- 3 Wood end blocks** are one of the most effective thermal breaks

**To save energy**, all components of a garage door must be taken into consideration (joints between sections, weatherstripping, end blocks, etc.) and not just its thermal resistance R-value as that only refers to the construction of the sections.

In garage door comparison tests, Garaga wins hands down. Watch our 45-second videos at [garaga.com/lab](http://garaga.com/lab) or scan the QR code to learn more about the Garaga construction.
